Submit Applications by Feb. 18, 2022 for Consideration in First Round

LINCOLN, Nebraska, December 13, 2021 – The U.S. Department of Agriculture (USDA) is accepting offers for a special Conservation Reserve Program (CRP) signup for agricultural producers and landowners who want to establish wildlife habitat on playa wetlands. Signup for the [Nebraska Conservation Reserve Program Migratory Birds, Butterflies, and Pollinators State Acres For Wildlife Enhancement \(SAFE\)](#) project begins today, Dec. 13, 2021. The signup is continuous, and the deadline to submit applications for consideration in the first round is Feb. 18, 2022.

Playas are shallow depressions that often fill with water after spring rainstorms, providing habitat for migratory birds and recharging the underlying aquifer. This signup is part of a broader USDA effort to restore wetlands, mitigate the impacts of climate change and enhance habitat for migratory birds and other wildlife.

“Vibrant and healthy wetlands provide tremendous benefits, from sequestering carbon to recharging groundwater,” said Tim Divis, acting State Executive Director with USDA’s Farm Service Agency (FSA). “The Biden-Harris Administration has called for a whole-of-government approach to combating the climate crisis, and this unique SAFE project is one example.”

The project is only available in the Southwestern, Central Table and Rainwater Basin playa areas in Nebraska. This includes eligible land in these counties: Adams, Banner, Blaine, Buffalo, Butler, Chase, Cheyenne, Clay, Custer, Dawson, Deuel, Dundy, Fillmore, Franklin, Frontier, Furnas, Garden, Gosper, Hall, Hamilton, Harlan, Hayes, Hitchcock, Jefferson, Kearney, Keith, Kimball, Lancaster, Lincoln, Logan, Loup, Morrill, Nuckolls, Perkins, Phelps, Polk, Saline, Seward, Thayer, Valley, Webster and York.

This SAFE project is a great example of how producers can benefit through voluntary efforts that provide environmental benefits. This project uses a competitive bid process. Landowners and

producers submit an offer to enroll their playa acres into the program for an amount they are willing to accept as an annual payment. Contracts are for periods of 10-15 years. The minimum enrollment per offer is two acres, and the maximum enrollment per offer is 160 acres.

Landowners who are interested in learning more about the CRP Migratory Bird SAFE project are encouraged to visit www.fsa.usda.gov/ne or contact their USDA Service Center. To find the nearest Service Center, visit farmers.gov/service-center-locator.
