

## SUPPLEMENTAL DAIRY MARGIN COVERAGE

### Overview

Supplemental Dairy Margin Coverage (DMC) is for small and mid-size dairy operations with less than 5 million pounds of DMC established production history that have increased milk production over time prior to 2020. Dairy operations may establish supplemental production history and enroll that supplemental production history in DMC during the 2023 coverage election period. Once Supplemental production history is established will be included in future DMC contracts and requires no additional action from the dairy operation.

### Who is Eligible?

For participation in 2021 Supplemental DMC, dairy operations must meet the following:

- DMC established production history of less than 5,000,000 pounds
- 2019 milk marketings must exceed established DMC production history
- Have an approved supplemental production history for the dairy operation on CCC-800A
- Agree to the terms and conditions prescribed by CCC.

### Enrollment

2023 DMC Coverage Election Period will occur: October 17, 2022 through December 9, 2022.

Contact your local USDA Service Center to apply.

### How it Works

#### Supplemental DMC Production History

To determine the dairy operations supplemental production history:

The dairy operations DMC established production history is subtracted from the dairy operations 2019 milk marketings with the result multiplied by 75 percent.

#### 2019 Milk Marketing Statement

To establish supplemental production history, the dairy operation must provide a record of 2019 milk marketings in pounds. County Offices will provide a copy of the 2019 marketing statement in the dairy operation DMC file folder.
